	Full Fuel Payload	900 lb	408 kg

Range based on a 4-passenger mission at HSC with NBAA IFR reserves (100 nm alternate).

SUCCESS FAVORS THE FOCUSED

EXPLORE THE
EXECUTIVE CABIN

ELEVATE YOUR PRODUCTIVITY

As the most customizable Citation® aircraft, cabin comfort has been transformed in the Citation Ascend™ jet. Not only do you have control over interior customizations for textiles and materials, but you can also select from a range of sustainable interiors, ensuring your journey is eco-conscious and luxurious. Additionally, you can choose from a variety of seat cushion firmness levels and opt for a flat floor or the optional dropped aisle configuration to maximize your comfort.

With sophisticated quiet cabin technology, you can relax in a peaceful atmosphere or maintain a productive workspace without the distraction of loud, unwanted ambient noise. Optional electric lumbar support, footrests and lighted window rings further elevate your experience, so you arrive at your destination focused, centered and poised for what's next.

INSPIRED BY HOW YOU DO BUSINESS

Power and control are at your fingertips in the flight deck of the Citation Ascend™ jet. With Garmin® G5000® avionics and the latest System Release 7 software, the Citation Ascend™ aircraft provides a better flying experience by reducing pilot workload.

THE PINNACLE OF PERFORMANCE

Standard Features:

THE FUTURE OF FLIGHT

At Textron Aviation, we prioritize efficiency and innovation in manufacturing and energy procurement because we're strongly committed to sustainability. Since 2022, all our Kansas facilities have been powered by 100% renewable wind energy. We're utilizing more environmentally friendly materials for aircraft interiors. And we're offering turbine aircraft that can operate with Sustainable Aviation Fuel (SAF), reducing our carbon footprint and helping contribute to a sustainable future for the planet.
