

CITATION HEMISPHERE

THE ULTIMATE COMBINATION
OF SIZE AND EFFICIENCY

Cessna

TEXTRON AVIATION

CITATION HEMISPHERE

The Citation Hemisphere™ aircraft redefines the large-jet category with its spacious cabin, time-saving speed, ambitious range, low cabin altitude and clean-sheet design. All of this combined with the farthest-reaching service network makes the Hemisphere an experience you need to fly to understand.

- A four-person range of 4,500 nautical miles permits extended worldwide missions.
- Get there faster and more efficiently with a class-leading maximum speed of Mach 0.90.
- A fuselage diameter of 8 feet 6 inches affords more room to move on longer flights.
- The 5,000-foot cabin altitude maximizes comfort and reduces fatigue.
- Two next-generation Safran™ Silvercrest™ engines power the Hemisphere with over 12,000 pounds of thrust.
- The latest Honeywell avionics offer large-format, high-resolution LED touch screens.

THREE-ZONE CABIN

Long-range convenience

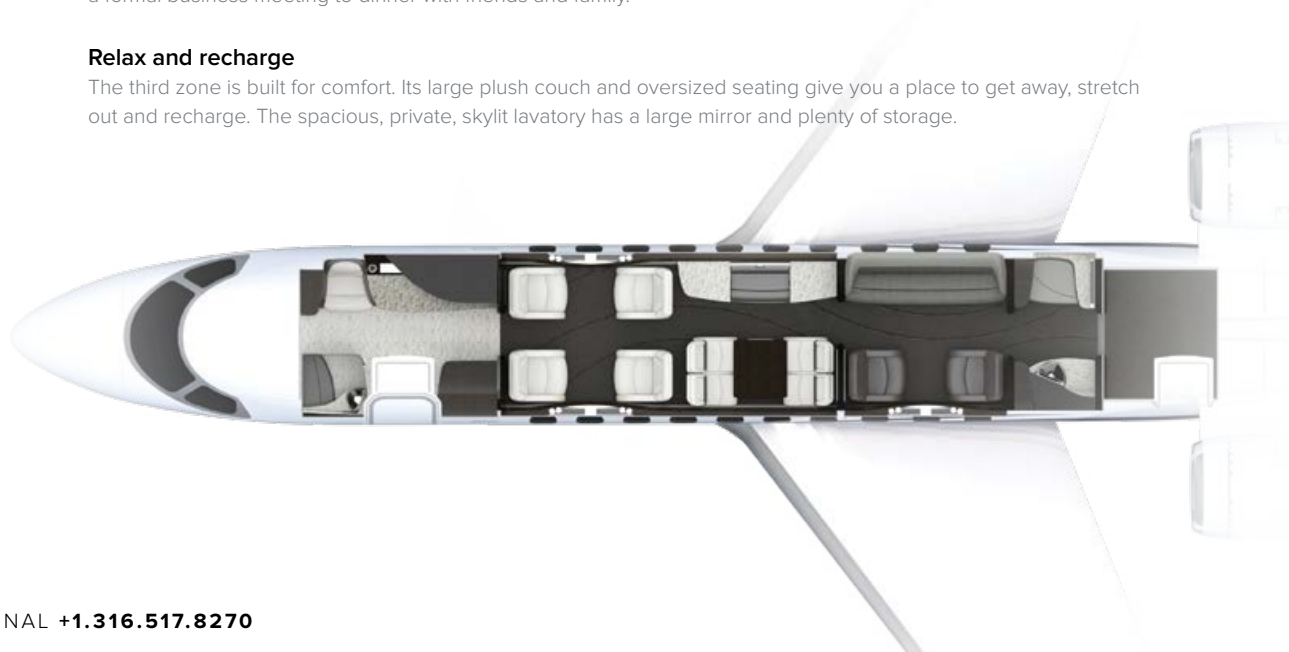

The first zone provides a spacious, brightly lit galley with granite surfaces that are ideal for preparing meals. The forward lavatory offers total privacy and quiet comfort.

Productivity at its finest

The second zone's large, relaxing seats and oversized windows provide the perfect space for everything from a formal business meeting to dinner with friends and family.

Relax and recharge

The third zone is built for comfort. Its large plush couch and oversized seating give you a place to get away, stretch out and recharge. The spacious, private, skylit lavatory has a large mirror and plenty of storage.
